# Ecoline

---

- The cleansing of any surface has become essential during this time, ELKE has worked in his laboratories for the development of extremely professional and cutting-edge products. We proudly present to the market two different product lines in addition to our sanitizing products with medical certification.

The product lines are addressed to two different but in some cases complementary markets. Our priorities in the formulation of these products were:

**PROFESSIONAL EFFECTIVENESS, HEALTH and ENVIRONMENTAL DEFENSE.**

The new line is completely "ECO-FRIENDLY", formulated with **100% VEGETABLE SURFACTANTS, HYPOALLERGENIC** and compliant with the **HACCP regulation**.

No impact on the environment unlike common products of petrochemical origin. The packaging is **100% RECYCLABLE PLASTIC**.

- ELKE thus launches a line with the aim of an ethical value for the conservation of our planet.

We thank you if you want to be with us in this project and revolution in favor of the environment.

## AUTOMOTIVE

Eco-friendly professional car care

This line includes products for the cleansing of internal car parts:  
**fabrics, leather, plastic, cromature acting as odor remover.**

Its extremely performing formulation boast an absolute novelty in the sector:

these products are formulated with 100% vegetable surfactants which, combined with the very high level of cleansing, have hypoallergenic characteristics and fragrance, **SLS e LES** free.
